Environment:	<ul style="list-style-type: none">Library Management Software version: V1.23.4Operating system: window11 ,window 10browser- chrome		

Attachments:	 crash.PNG
---------------------	---

Description

1. User is unable to renew the book which he/she has already issued. When the user tries to renew the book, the renewal fails and the book's due date remains the same.
2. Additionally, when the user adds more than 2 books in the Issue Book category, the application **crashes** repeatedly.

Steps to Reproduce:

1. For "Unable to renew book":
 - Log in to the Library Management Software <http://liberary.com/books/>
 - Borrow a book from the library
 - Navigate to the borrowed book list and click on the "Renew" button for the borrowed book
 - Observe that the renewal fails and the due date for the book remains the same

2. For "Application crashes after adding more than 2 books in Issue Book category":

- Log in to the Library Management Software
- Navigate to the "Issue Book" category
- Add more than 2 books in the category
- Observe that the application crashes and an error message is displayed

Expected Result:

1. The book should be successfully renewed and the due date should be updated accordingly.
2. The application should be able to handle adding more than 2 books in the Issue Book category without crashing.

Actual Result:

1. The book is **not renewed successfully** and the due date remains the same.
2. The application **crashes** when more than 2 books are added in the Issue Book category.
